

1**Air Event**

Political tensions have caused oil output to drop forcing the use of alternative fuels. Alternative fuels, such as solar and wind, create less pollution and have less of an impact on the environment.

**1****Air Event Interrupt**

Solar panel technology advances. New highly efficient solar panels can run at 80% efficiency. Increased use of solar panels lowers the consumption of fossil fuels.

**3****Land Event Interrupt**

Construction technology advances and major highways are placed underground. Thousands of acres of land are donated to state and federal parks.

**A****Discard**

Choose a player other than yourself. That player must discard two cards, randomly chosen by you, to the discard pile.

**2****Water Event**

Volunteer groups clean up the beaches of the U.S. coast creating a pollution free habitat.

**4****Air Event Interrupt**

Insulation technology advances. Newly constructed buildings use less heating fuel and create less air born pollution.

**A****Discard**

Choose a player other than yourself. That player must discard two cards, randomly chosen by you, to your hand. Discard down to the hand limit if necessary.

**1****Land Event**

Nuclear technology advances. Nuclear fusion provides enough clean energy that farm buildings can be constructed. These building replace farms and allow farmland to be reclaimed by nature.

**1****Land Event Interrupt**

Nuclear technology advances. Nuclear fusion provides enough clean energy that farm buildings can be constructed. These building replace farms and allow farmland to be reclaimed by nature.
